# Charging Ahead: The Rapid Rise of Electric Scooters in India

**Vinod Chandrashekhar Dixit**  
Free-lance Journalist, Writer & Cartoonist  
(dixitpatrakar@yahoo.in)

India's electric two-wheeler market is experiencing significant growth, driven by government incentives, technological advancements, and increasing consumer demand for eco-friendly and cost-effective transportation solutions. Electric 2-wheelers are witnessing a growth in popularity in India. The Indian two-wheeler market is undergoing a transformation like never before, and at the centre of this change is the rise of electric scooters.

The Indian e-scooter market is buzzing with innovation as manufacturers roll out 15-20 new models catering to both budget-conscious and premium-segment buyers. Mainline brands like Honda are also entering the fray with their much-anticipated electric Activa, featuring swappable battery technology to address charging and downtime concerns. Electric scooters are gaining popularity in India as a sustainable and cost-effective mode of transportation. With rising fuel prices and increasing environmental concerns, more people are turning to electric scooters as a cleaner alternative to traditional petrol-powered vehicles. Electric two-wheeler sales have surged, with over 93,872 units sold in June 2025, representing a 35% year-on-year growth. In May 2025, sales reached 1,00,266 units, up 30% year-on-year. The rise of electric scooters in India isn't just a trend—it's a revolution in how the country moves. The history of electric scooters in India reveals a significant shift in recent years. Today's electric scooters feature sleek, aerodynamic designs with an emphasis on comfort and style. The adoption rate of electric 2-wheelers is increasing in India, with more people making the switch to electric vehicles. This is due to the benefits of electric 2-wheelers, that are mentioned above. As more people adopt electric 2-wheelers, the infrastructure for electric mobility will improve, making it even more convenient for consumers. Manufacturers are using premium materials and offering vibrant color choices, making electric scooters not just a mode of transport but also a fashion statement. This evolution in design reflects changing consumer

preferences, as more people seek stylish and eco-friendly transportation options. Innovation is a key driver in the Evolution of Electric Scooters in India, especially in battery technology. Modern electric scooters come with improved batteries that address range concerns, allowing longer trips on a single charge. Advancements in charging infrastructure and faster charging technology enhance convenience and address user concerns about battery life. Many electric scooters now support fast-charging capabilities, allowing users to charge their vehicles quickly and conveniently at home or public charging stations. The government's push towards electric mobility and the availability of subsidies and incentives have further fueled this trend. Electric scooters offer a convenient and eco-friendly way to commute, especially in

congested urban areas. Modern electric scooters come equipped with smart displays that provide real-time information about battery life, range, and performance metrics, allowing users to monitor their ride more efficiently. The electric scooter market in India is expected to continue growing rapidly, driven by increasing consumer awareness and government support. Future electric scooters are likely to feature advancements such as longer battery life, faster charging, and improved performance, making them more attractive to consumers. Continued government incentives and regulations favouring electric vehicles are expected to further boost the adoption of electric scooters. The electric scooter market in India is witnessing significant growth, with several key players driving innovation and competition. Some of the

major companies manufacturing electric scooters in India include Ola Electric, TVS Motor, and Ather Energy who are among the top players in the market. Ola Electric dominates the market with a 34.2% share, followed by TVS Motor with an 18.4% share. The rise of electric scooters in India represents a significant shift towards sustainable and eco-friendly transportation solutions. With increasing government support, technological advancements, and changing consumer preferences, electric scooters are becoming a popular choice among commuters. Overall, India's electric two-wheeler market is poised for significant growth, driven by a combination of government support, technological advancements, and increasing consumer demand. **(B-15 Jyoti-Kalash Society, Jodhpur Tekra, Satellite, Ahmedabad - 380 015)**

# Surat RFO shot while travelling with son, police probing GPS-tracking link

Ahmedabad, A woman Range Forest Officer (RFO) from Surat district was shot in the head under mysterious circumstances while travelling with her five-year-old son in a WagonR car on Thursday morning. The incident occurred in Kamrej taluka, just three days after police registered a case over a GPS device found secretly installed in her vehicle. According to police, Sonal Arvindbhai Solanki (33), a resident of Jokha village in Kamrej, lives with her parents and brother. She is currently posted as a RFO at the Adajan range office in Surat. In 2020, Sonal married Nikunj Krantigiri Goswami, an RTO officer in Surat. However, the couple have been living separately for about a year due to marital disputes. A few days ago, while clearing her car, Solanki reportedly found an active GPS device fixed to the rear.

Following her complaint, Kamrej police registered an FIR on Monday against an unidentified person for allegedly attaching the tracker to monitor her movements. On Thursday morning, amid foggy weather, Solanki left home with her young son for Kamrej. While driving on the road between Jokha and Kamrej, unidentified assailants reportedly opened fire on her car.

## Christianity is Indian, not foreign, says Archbishop Thazhath

Thrissur, "In North India, the Christian Church is being falsely portrayed as foreign. But Christianity has existed in India for over 2,000 years. It is inherently Indian, not alien," said Archbishop Mar Andrews Thazhath, head of the Thrissur Archdiocese of the Syro-Malabar Catholic Church on Thursday.

St. Thomas, one of Lord Jesus' 12 apostles, arrived in Kerala around 52 CE, establishing the first churches there and making India one of the first countries to adopt Christianity. He travelled across the subcontinent, reaching present-day Chennai, where he was martyred in 72 AD at St. Thomas Mount. The community he established are among the oldest Christian communities in the world and have a unique history and identity.
